Compound Income:-

Plan Condition – Compound Income is an income of income to direct Activation this income is down line Compound income is the income that whatever joining is done by his referral, he will get % of his income to his referral. Level By Level Difference % Level 5 and more than
Example:- Suppose Level 1 Compound % is 10%, Level 2 Compound % is 8%, Level 3 Compound % is 6%, Level 4 Compound % is 4%, Level 5 Compound % is 2%

This chart Aman is refer all id self so compound Income is generate his income

Suppose this month income is   Person **A** income – 10000, Person **B** income – 20000, Person **C** income – 1000, Person **D** income – 30000 and Person **DA** income – 40000

So compound income is Aman by Person **A - 10000*10%= 1000**

Person **B - 20000*10%= 2000**

Person **C - 1000*10%= 100**

Person **D - 30000*10%= 3000**

Person **DA - 40000*8%= 3200** (this id is under Person **D** but Refer by Aman Direct self-Level 2 and Level 2 compound income is 8%)

Person E down line is **Person D** but not self-refer so not calculate this ID compound income

So total compound income is Person Aman is 1000+2000+100+3000+3200=**9300**

Not generate any income by compound income (compound income not included Rank Achievement Income and compound income) Referral can apply compound id only in leg 1 from 2nd level and can apply compound ID below his compound ID only

Note: - Compound income closing monthly generate
